Background:

There are five United States Geological Survey (USGS) streamflow gaging stations on the main stem of the San Juan River that are very important to management of the river and the operation of Navajo dam to implement the San Juan Recovery Implementation Program (SJRIP) flow recommendations. Stream gaging data on the San Juan River are necessary to reliably implement and revise the SJRIP flow recommendations.

Study Area:

San Juan River Basin in New Mexico

Objective:

Provide funding to the USGS to take additional flow measurements as needed at the four San Juan River gages in New Mexico. The four gages are San Juan near Archuleta, San Juan at Farmington, San Juan at Shiprock, and San Juan at Four Corners. (Note: Base cost for operation of the stations is paid for by non-Program funds.)

Products:

1. Improved flow measurement and more accurate gage readings.
2. Technical report at the end of the year from USGS summarizing the activities completed and the value of obtaining additional readings.

Budget FY-2022:

Objective: Provide funding to USGS for 12 additional flow measurements at the four San Juan River Gages in NM.	Staff days	Labor	Travel	Equipment and supplies
Personnel	7.5	7,600		
Travel			1,950	
Equipment and supplies				0
Total				\$9,550

Estimated Outyear Funding (Based on 3% adjustment for inflation)

Fiscal Year 2023	\$9,840
Fiscal Year 2024	\$10,100
Fiscal Year 2025	\$10,400
