- III. Project Summary: Provide fish passage at this, the most upstream of the three diversion dams on the Colorado River near Grand Junction, Colorado. This will be a selective passage structure if selective passage is not constructed at the Price-Stubb fish passage.
- IV. Study Schedule: Started on river modeling and conceptual designs in FY00. A Biological Assessment has been prepared and the FWS is working on a Biological Opinion. An internal draft of the Environmental Assessment has been prepared. Construction is scheduled to start in FY02.
- V. Relationship to RIPRAP: Colorado River Action Plan: Mainstem II.B.3.
- VI. Accomplishment of FY 00 Tasks and Deliverables, Discussion of Initial Findings and Shortcomings: A conceptual analysis study for the fish passageway and fish screen was completed. December 20, 2000. Work in FY00 completed river cross sectional surveying necessary for river modeling.
- VII. Recommendations: None.
- VIII. Project Status: Scheduled for construction in FY200
- IX. FY 00 Budget Status
- A. Funds Provided: \$77,696
 - B. Funds Expended: \$77,696
 - C. Difference: 0
 - D. Percent of the FY 00 work completed, and projected costs to complete: 100
 - E. Recovery Program funds spent for publication charges: None
- X. Status of Data Submission (Where applicable): *N/A*
- XI. Signed: Robert Norman 1/11/01
